

Infrastructure-as-a-Service

Gain ready access to enterprise-class computing resources while maintaining control of your environment.

Realize the full flexibility, scalability, and business continuity benefits of the cloud from a single-source service provider.

Find Your Future in the Cloud

With the advent of cloud computing, organizations are no longer limited by the high capital expense and ongoing support, maintenance, and operating costs of in-house hardware systems. With NTT DATA's Infrastructure-as-a-Service (IaaS) offerings, organizations can realize substantial cost savings, greater flexibility, and improved system availability, performance, and business continuity for some or all of their IT needs.

NTT DATA offers a full range of IaaS offerings across all cloud deployment models – dedicated private, virtual private, public, and hybrid clouds. This flexibility enables organizations to match application needs to the proper cloud configuration whether it be a dedicated, single-tenant private cloud within their data center or a secured, multi-tenant virtual private cloud hosted and managed by NTT DATA. Unlike most other cloud computing service providers, NTT DATA supports the full lifecycle of cloud needs, including advisory, modernization, operational, and ongoing management services. This holistic approach ensures that your migration to the cloud is smooth and seamless.

More Options to Suit Your Needs

Freedom of choice is one of the driving forces behind the move to the cloud, and few cloud computing service providers offer the range of choices available to NTT DATA clients. With NTT DATA, you have a single provider that offers IaaS deployment models with configurations for dual data centers, backup, full replication, flexible disaster recovery choices, and enterprise-class service levels for availability, performance, and security. This gives you the freedom to have a customized cloud implementation – with applications hosted in dedicated private, virtual private, public, and hybrid clouds based on your specific business and security priorities – while benefiting from the convenience and control of one-stop shopping.

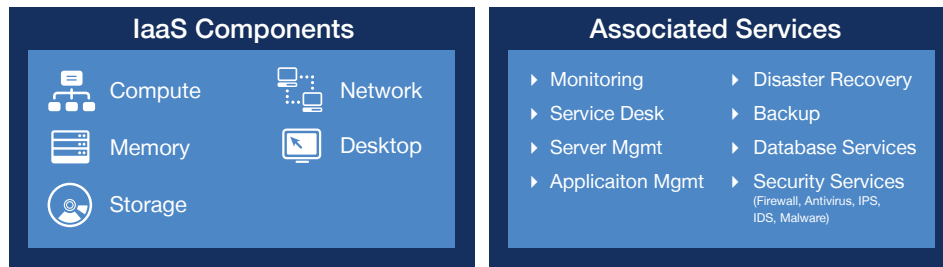

Our capabilities include:

- » Vendor-agnostic hosting of client- or NTT DATA-developed applications in our secured, single-tenant dedicated private cloud or in our flexible, multi-tenant virtual private cloud
- » Mission-critical applications hosting with flexible service level options, including high availability for your most important workloads
- » A platform for delivering NTT DATA software development lifecycle (SDLC) services
- » Enterprise application hosting and licensing for SAP, Oracle, PeopleSoft, SharePoint, Lawson, and more
- » VCE Vblock design and implementation services
- » Client-developed or commercial SaaS hosting

Financial Benefits

- » Reduced costs for facilities and infrastructure support
- » Elimination of capital purchases and financing for technical infrastructure and facilities upkeep
- » Elimination of hardware and software maintenance fees
- » Elimination of third-party data center disaster recovery contracts
- » Reduced power and cooling costs
- » 25–40% savings in operations and support when NTT DATA manages your cloud infrastructure
- » Greater cost predictability through a choice of fixed or pay-as-you-go monthly fees
- » Transparent delivery of system patches and technology and facility upgrades at no additional cost

THINK SMART. ACT FAST. FLEX YOUR BUSINESS.

Our private, public, and hybrid cloud solutions leverage leading converged infrastructure platforms to accelerate ROI.

NTT DATA IaaS Advantages

- » Combined applications and infrastructure support
- » SSAE 16 audited and attested data centers with HIPAA-compliant, enterprise-class hosting architectures with highly fault tolerant design characteristics
- » Pre-configured and tested disaster recovery infrastructure and processes with flexible options for hot, warm, and cold disaster recovery
- » Full and incremental backups with single-step recovery of individual files or complete virtual machines
- » 24/7 multi-channel service desk (web, email, phone) with options for system administration and advanced engineering services
- » Access to NTT DATA's broad technical infrastructure expertise
- » Proactive monitoring and alerting of capacity and performance thresholds
- » Detailed reporting on performance characteristics of your applications and infrastructure

Infrastructure-as-a-Service

NTT DATA offers a full range of services across all cloud infrastructures.

- » Dedicated private cloud hosted on client premise or at NTT DATA's facilities
- » Sample scenarios: development, testing, and pre-production environments
- » Virtual private cloud, a secured multi-tenant off-premise VPC
- » Sample scenarios: SaaS and IaaS hosting, mission-critical application hosting, and application development and testing services
- » Public cloud hosted by NTT DATA or another provider
- » Sample scenarios: sandboxing, product demos, and proofs of concept
- » Hybrid cloud
- » An optimized mix that enables you to leverage the advantages of the public cloud for appropriate applications while maintaining control over vital systems

About NTT DATA

NTT DATA is a leading IT services provider and global innovation partner with 75,000 professionals based in more than 40 countries. NTT DATA emphasizes long-term commitment and combines global reach and local intimacy to provide premier professional services, including consulting, application services, business process and IT outsourcing, and cloud-based solutions. We're part of NTT Group, one of the world's largest technology services companies, generating more than \$112 billion in annual revenues and partner to 80% of the Fortune Global 100. Visit www.nttdata.com/americas to learn how our consultants, projects, managed services, and outsourcing engagements deliver value for a wide range of businesses and government agencies.
